

# Class Deck

The one place to track all your learning

# Freya Johnson

---

Freya is a **16 year old** highschool **Junior** living in United States.

Full time **student** and works a **part time job** at night and on the weekends.

She love always being **on the go**, and enjoys trying new things.

# Goals & Motivations

---

- Wants to graduate **Valedictorian** and be accepted into Ivy League College.
- Work part time to save up money for **college**.
- Graduate from an Ivy League College and land her **dream job**.

# Problem Brief

---

Freya's time is valuable and she needs to **streamline** her study **time**.

She needs a way to regularly **track** and **practice vocabulary** mastery for all her classes.

She needs **24/7 access** this vocabulary practice space.

# Challenges

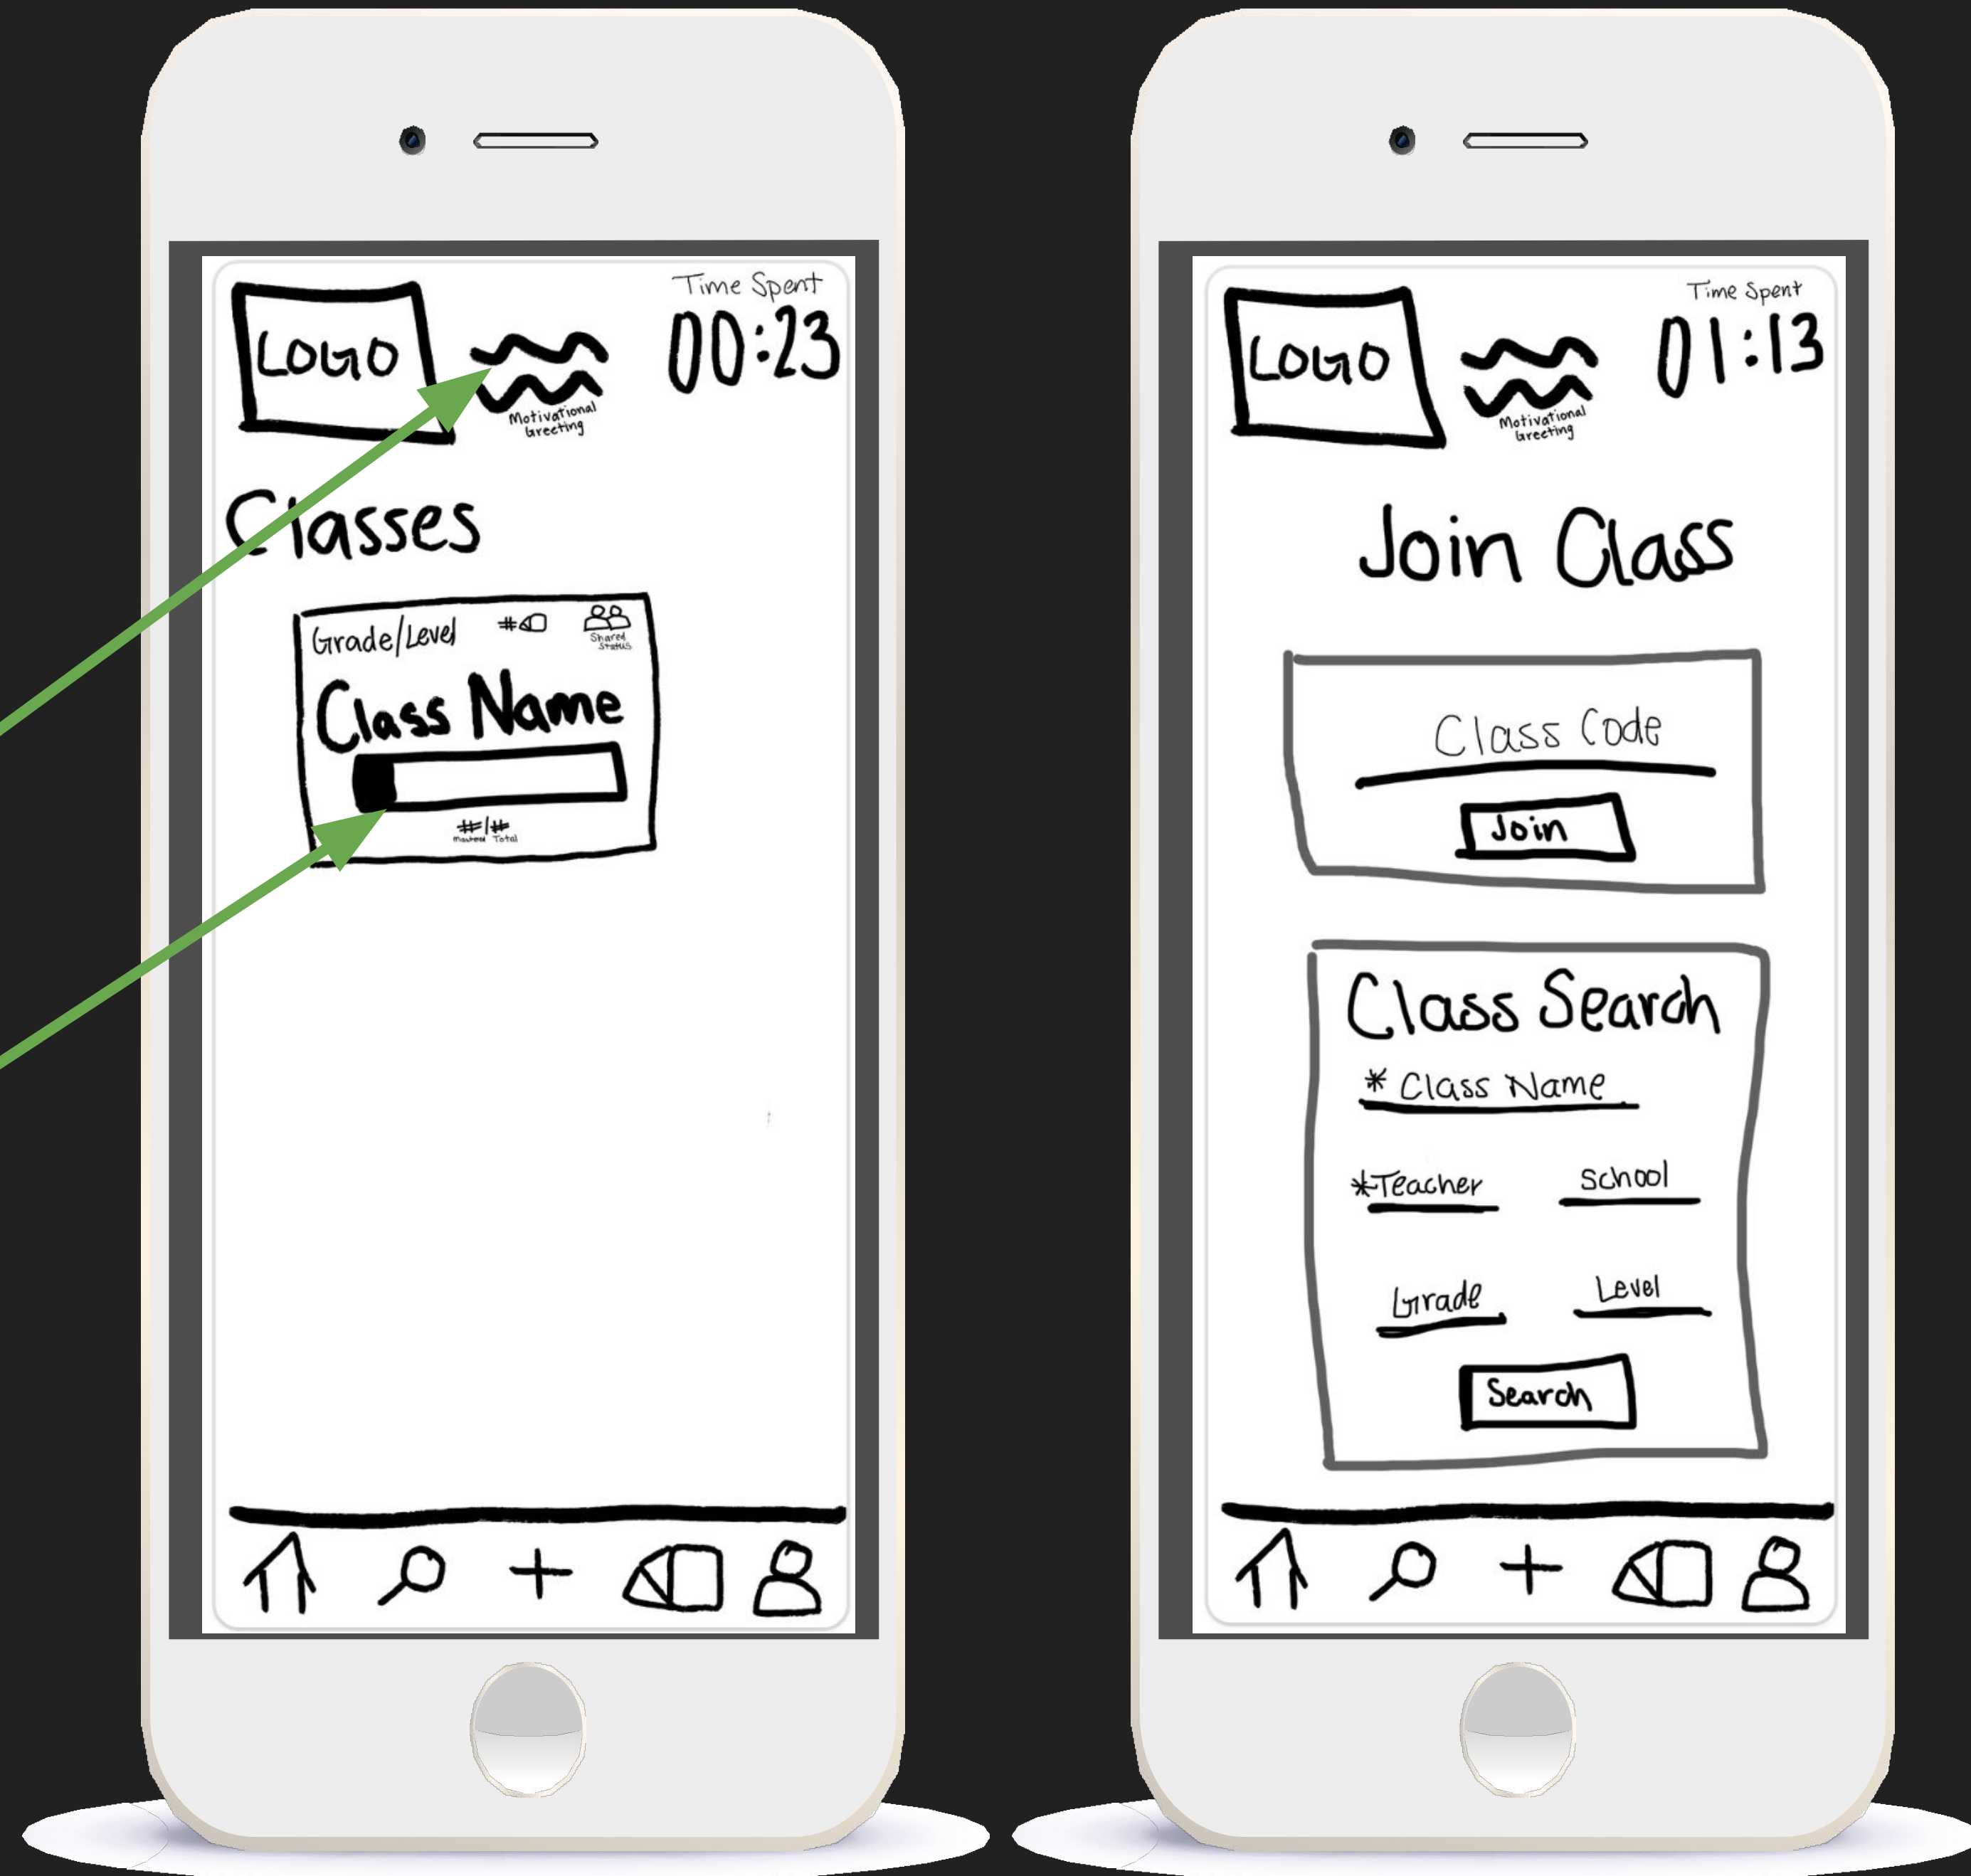

---

- Keeping track of all her **different classes** vocabulary.
- Track **mastery** in each class content.
- Track **time** spent on studying vocab.
- Engaging app that keeps her **engaged** and **motivated**.

# Prototypes

- Made Classes the focus
  - Create a Class
  - Join or Search premade class
- Motivational Messages
- Mastery View @ a glance

# Usability Test

---

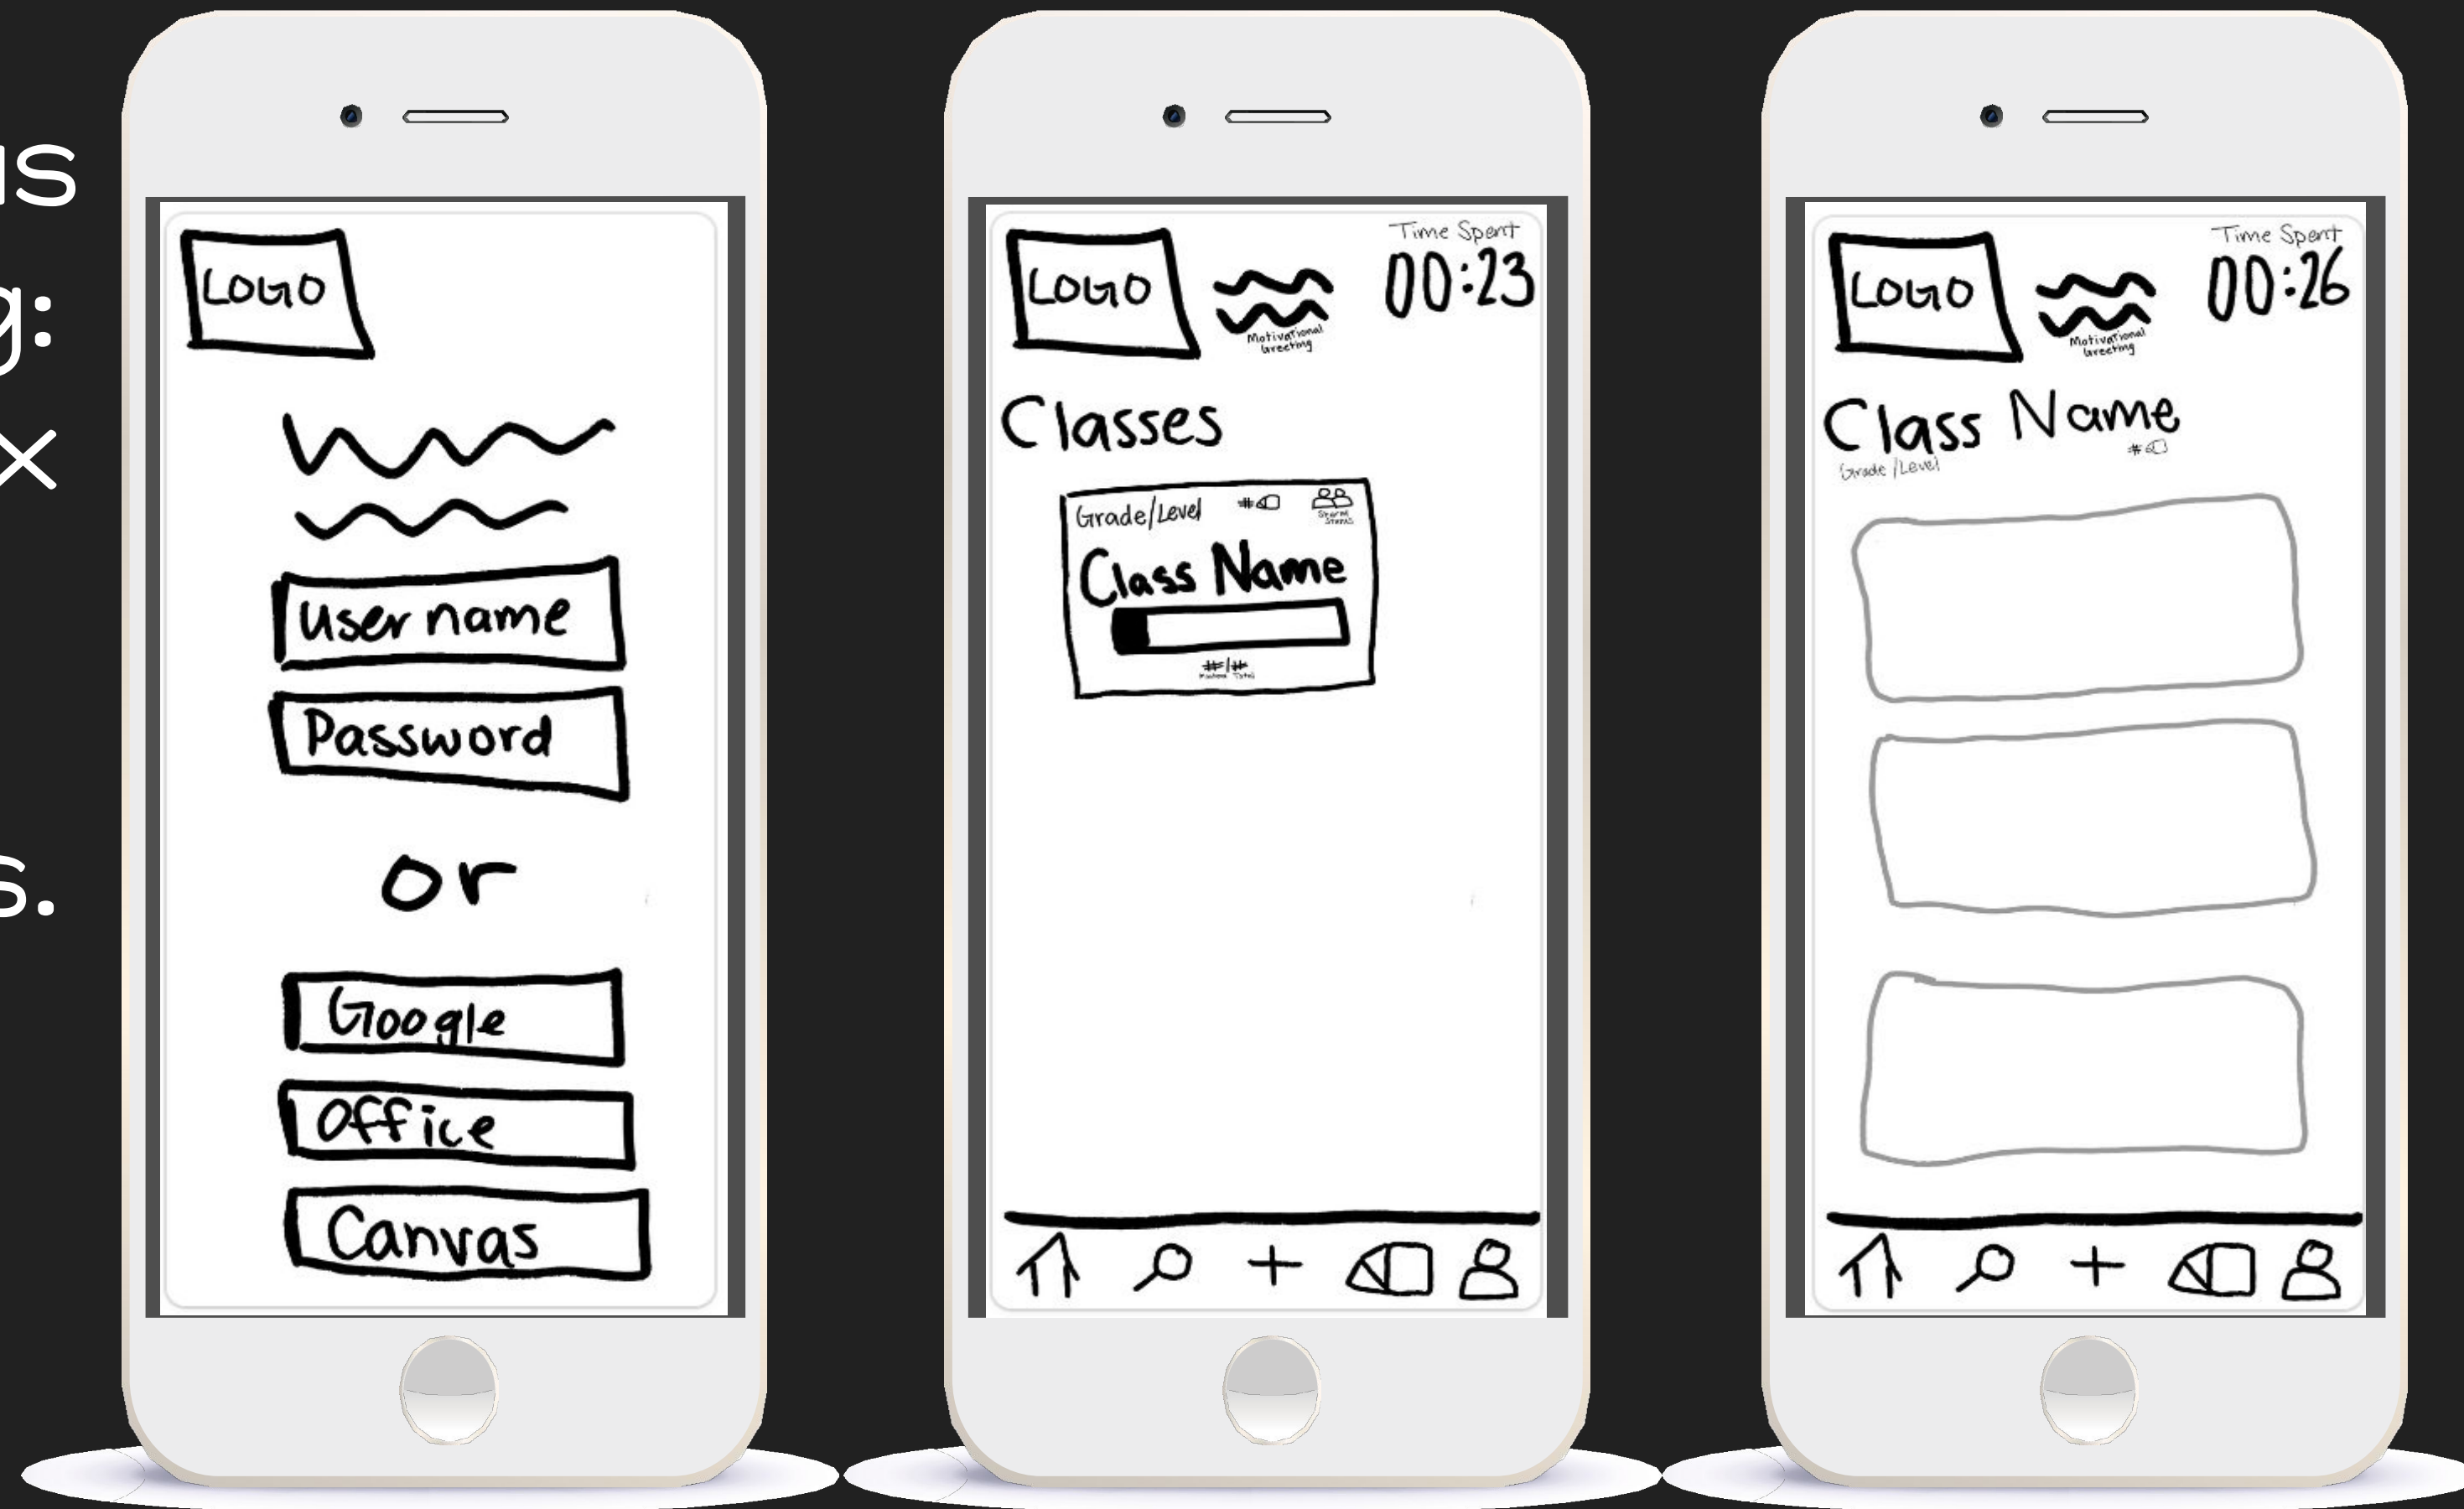

- We conducted usability test with ClassDeck with 5 participants.
- Each test was between 10 - 15 minutes.
- The task performed were
  - Sign Up
  - Create a Class
  - Join a Class
  - Add a new deck to a Class.

# Early Errors & Improvements

From the feedback received from users, the most obvious errors included the following:

- Password Confirmation Box Needed
- The “+” button needs to be relocated for easier access.
- The “+ deck” button needs to be relocated.
- Menu bar need to be minimalized.
- Profile needs to be relocated.

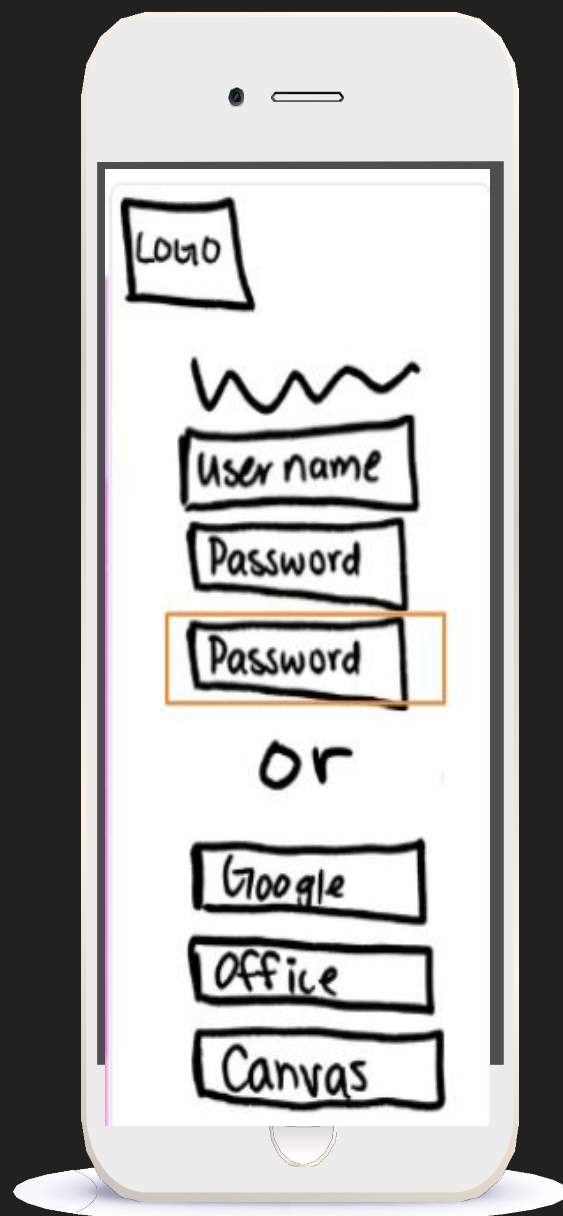

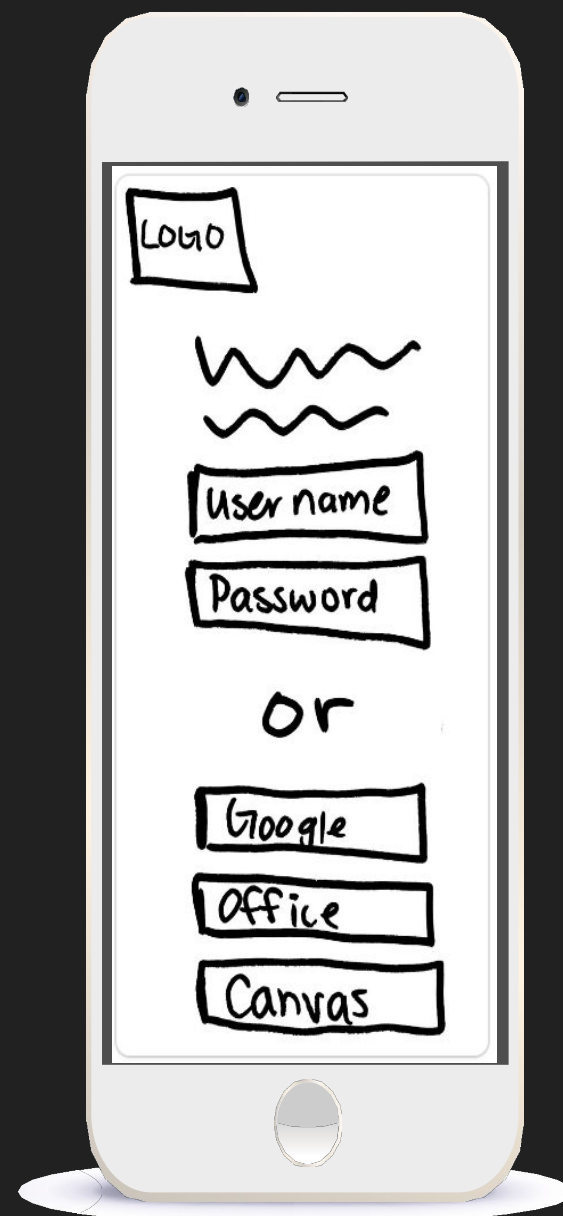

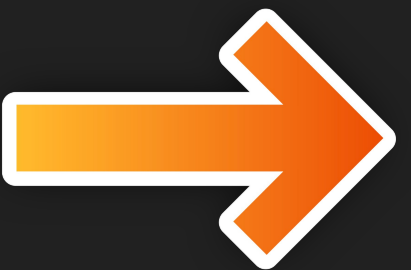

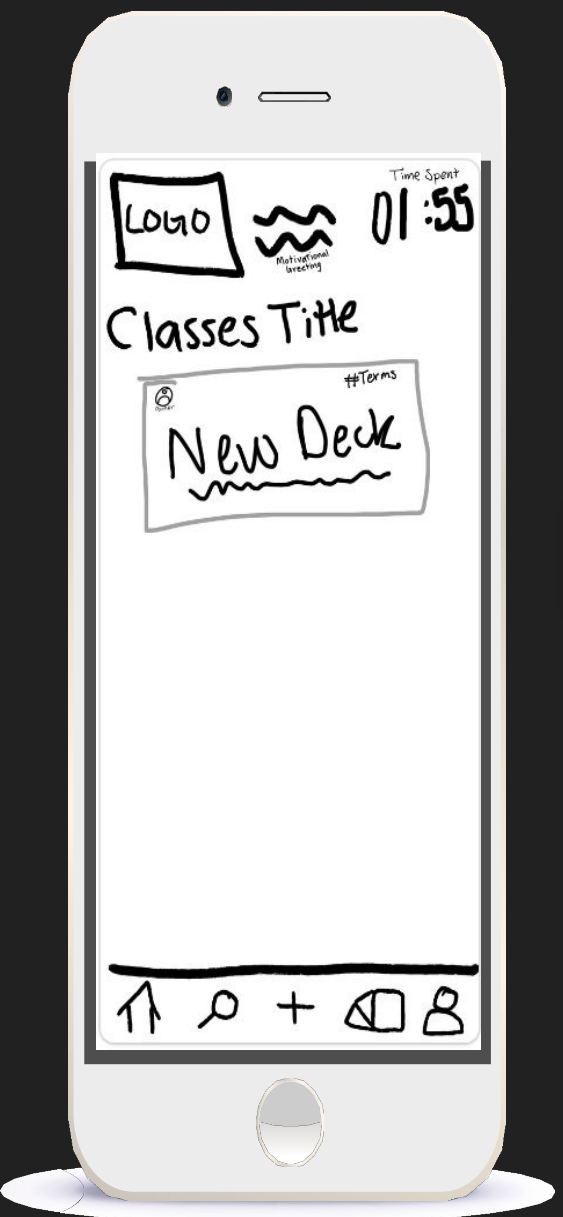

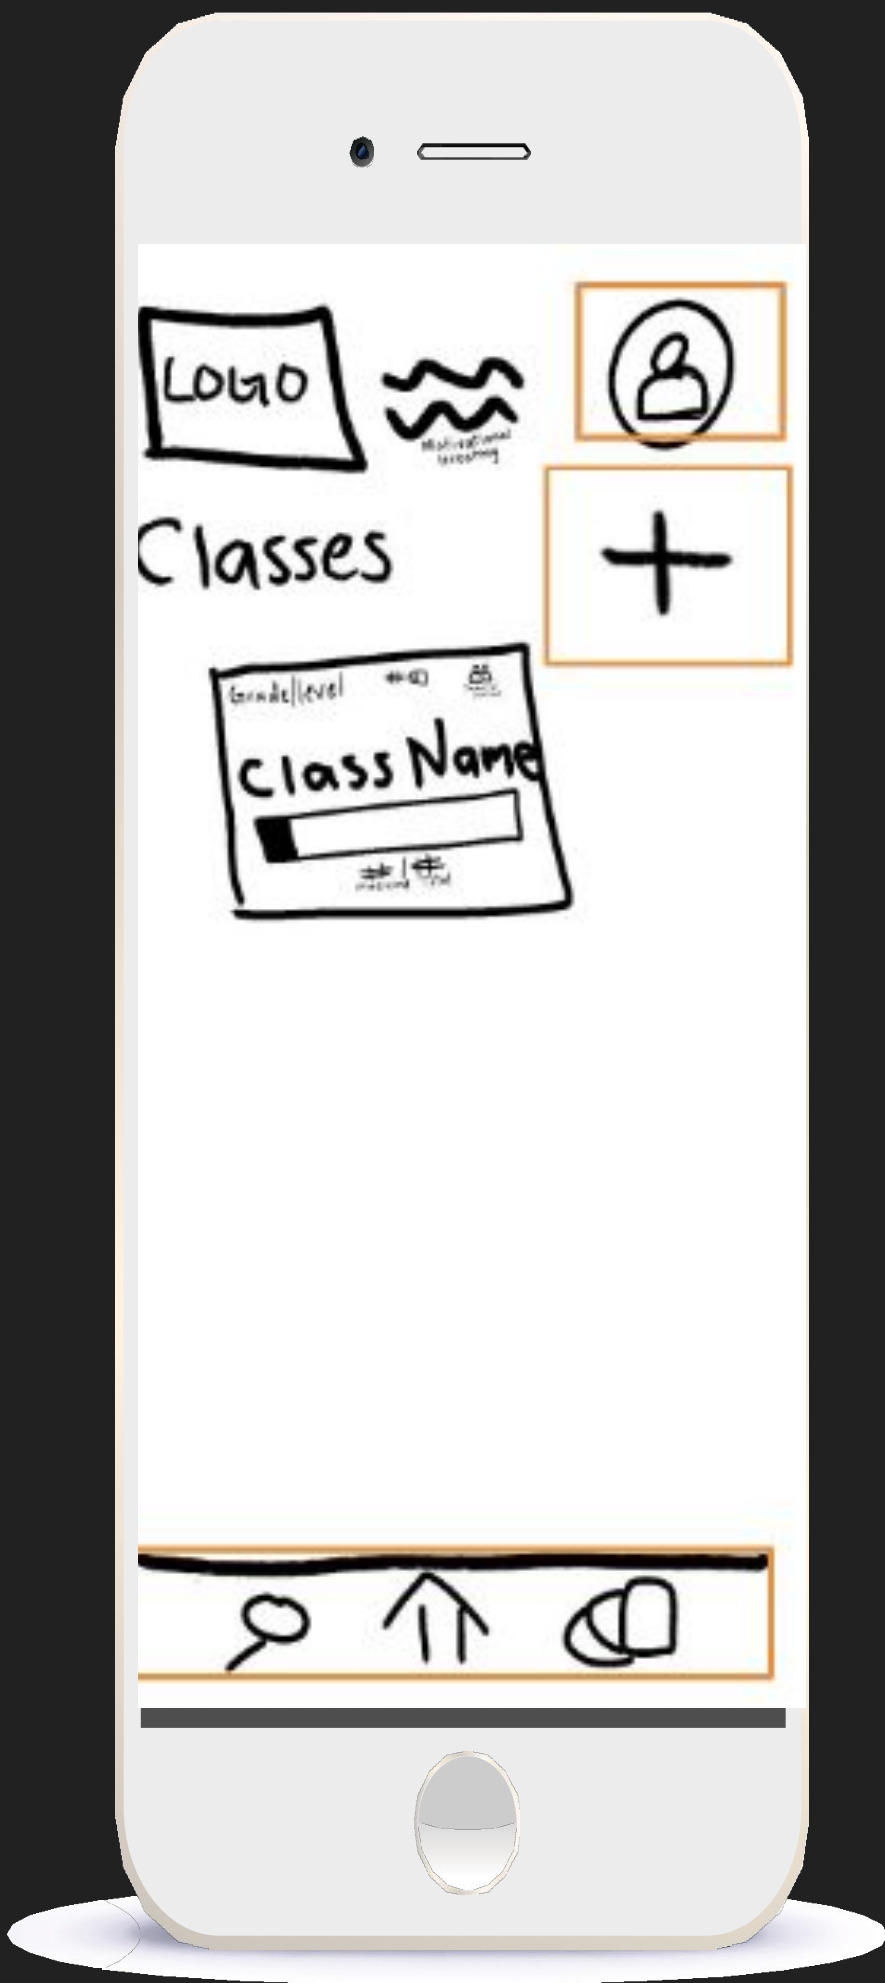

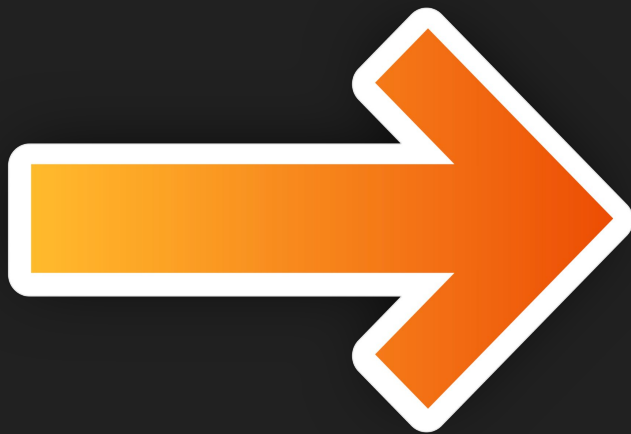

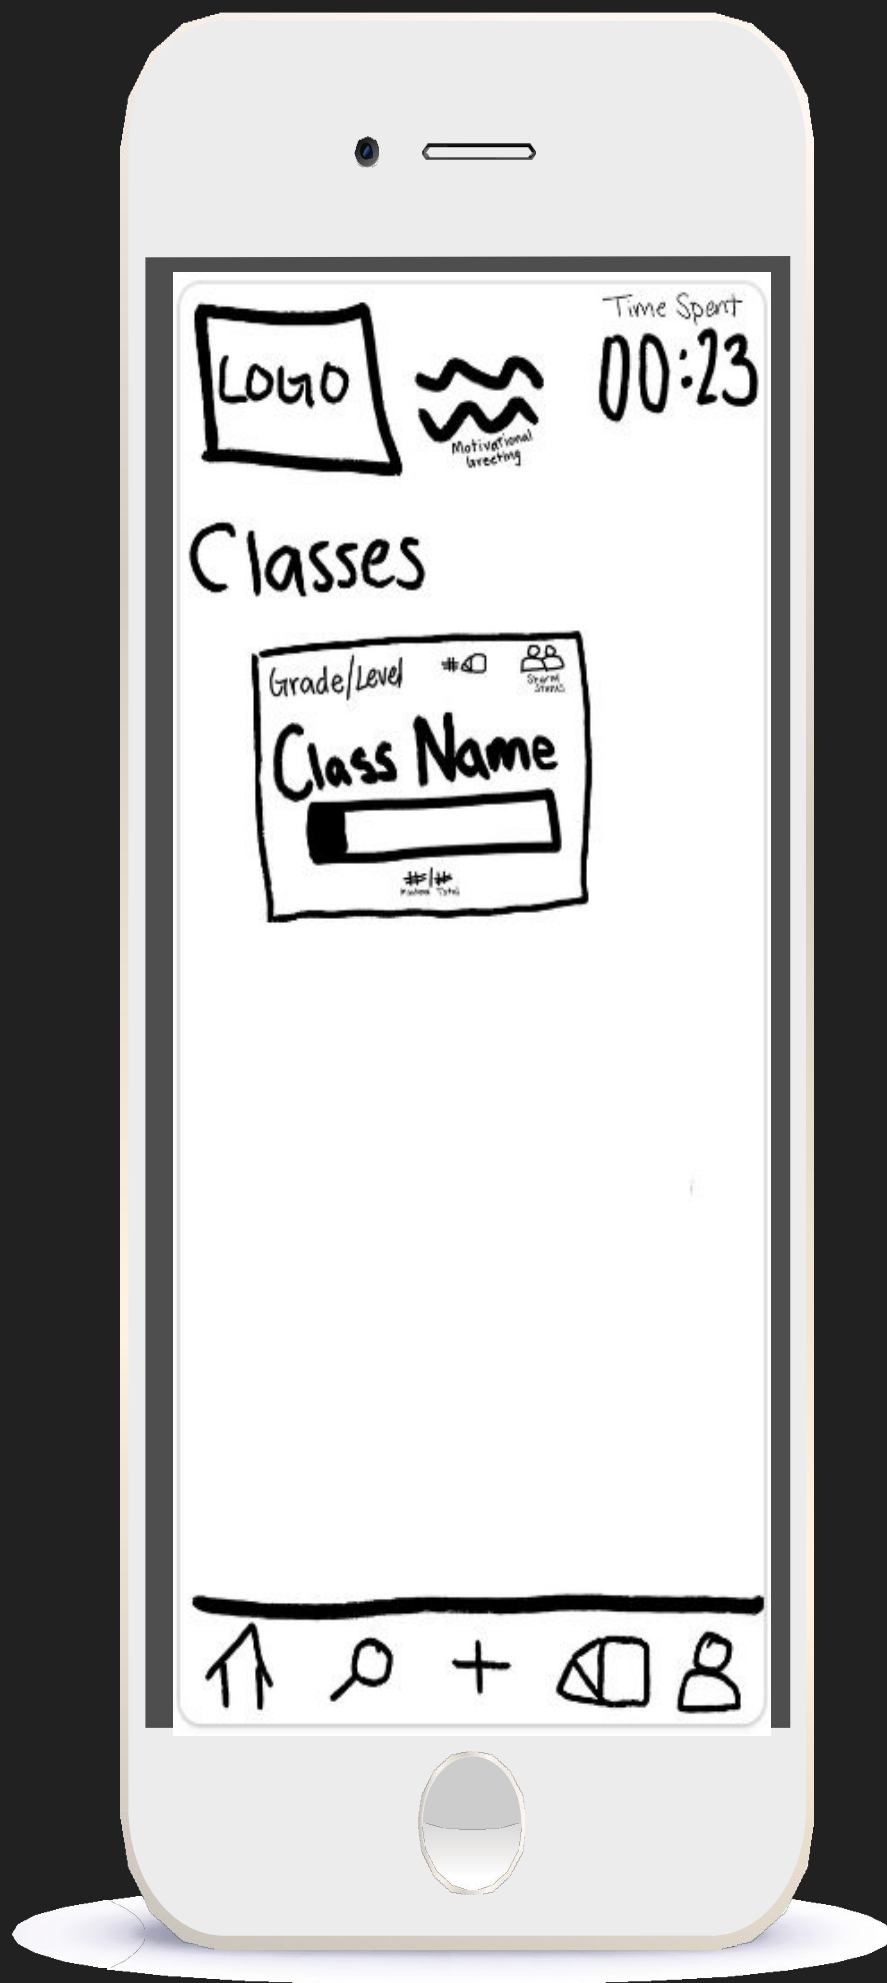

# Updates

Add a Class "+"  
Relocation & Menu  
bar Minimization

"+ Deck"  
Relocation

Password  
Confirmation

# Next Steps

---

- Smooth out the design to make it more sleek, modern and as
- Create different types of tools or games users can use to study their vocab decks
- Conduct User Test on other tasks like studying decks, tracking progress.
- Build out a library page of premade decks

# Learnings

- Stay flexible and adaptable.
- It doesn't have to be perfect to conduct user test.
- Refer back to user persona when stuck or to get inspiration for design choices.
- What works best for me won't necessarily work best for the users, test frequently.
- Use other similar apps as a guide when first designer. Especially when it comes to placement of tasks buttons
- Flow is important
