

LIZI JENKINS

UX DESIGNER

Profile

An experienced middle grades science educator and educational leadership graduate with expertise in empathetic design thinking, collaborative teamwork, and user-centric solutions, seeking to apply educational and UX design skills to create engaging digital experiences.

PROJECTS

THE SCIENCE SPOT Jan - Sept 2023

Final Project at CareerFoundry

Problem: Science Educators need a way to connect with other educators and experts sharing advice and reliable lessons because they wish to give their students the best education possible.

Process Phases: competitive analysis, surveys, user interviews, card sorting, affinity mapping, personas' creation, user flows, low to high fidelity wireframes and user tests.

Solution: A responsive app that provides educators one spot to access the resources, community and expert advice they need to be an outstanding educator.

CLASS DECK Nov 2022 - Jan 2023

Intro Course at CareerFoundry

Problem: Busy students need an engaging and motivating way to master class vocabulary.

Process Phases: competitive analysis, user interviews, personas' creation, user flows, prototyping, flows, prototyping, low-fidelity wireframes and usability tests.

Solution: A vocabulary app based on tracking learning in user created or joined classes.
